OPTIMISED FIT

Wide forefoot area to avoid irritating the toes and reduce pressure points.

PU OUTER SOLE

SRC slip-resistant, flexible and durable, oil resistant, good cushioning for optimal foot comfort.

LINING WITH SILVER IONS

Textiles that are treated with silver ions are characterised by their high antibacterial effect. Bacteria and fungi are inhibited in their reproduction. Unpleasant odours are reduced. The catalytic property of silver has a positive effect on the reduction of germs and the inhibition of odours in footwear.

CARE INSTRUCTIONS

When using the washing machine, you HAVE TO ::

- use a „hand wash“ programme to avoid straining the shoes too much.
- remove insoles before washing
- in the case of colored shoes, remove the laces if they are white to avoid discoloration
- Use a soft detergent. A wool detergent can be used for textile shoes
- DO NOT use fabric softener. This can make the upper materials porous and generate unpleasant odours in the shoes.
- Wash shoes, if possible, in a laundry net to provide additional protection from the washing drum.

For drying, we recommend:

Use newspaper to stuff the wet shoes to reduce the drying time.

For drying DO NOT :

1. use tumble drying, it can seriously damage the shoe.
2. dry in the sun, there is a risk of discoloration, especially with white shoes and outsoles.
3. dry on or under a radiator, high temperatures would damage the shoes.

SHOELACES

- Set of 3 colours (red, blue and green), length 80 cm for low shoes
- art. 370118

CUSTOMIZE

We offer the possibility to print your company logo on our shoes!
