

FORTO

01-000045

The Forto 01-000045 safety footwear is made of high-quality, grain leather in black. The higher upper and antibacterial insole provide all-day comfort for employees. Fitted with a non-slip rubber sole, they prevent slipping on oily and wet surfaces. In addition, the safety boots are resistant to contact with hot floors. The safety boots are characterised by resistance class O2, which means that they are occupational boots for daily use. They can be used wherever toe protection is not required. Especially for transport workers, drivers, warehouse workers, couriers and forklift operators. Available in sizes from 39 to 48.
