

FENIX

01-017469

The Fenix safety work boots with a high upper ensure the worker's safety in any situation. They effectively protect the feet from injury and the heat resistant sole provides additional protection from overheating. The work boots are made from heat-resistant grain leather, which has a direct impact on eliminating the risk of injury to the worker. The Fenix safety boots have resistance class S2, which means that they are equipped with a metal toe cap and absorb energy in the heel area, which has an impact on the comfort of the worker. The footwear is suitable for heavy industry and wherever the worker comes into contact with high temperatures and the required protective clothing must be heat-resistant.

Brand	PROTEKTOR
Industry	Heavy industry
Product type	Ankle boots
Color	● Black
Norm	EN ISO 20345:2011
Certificate	IPS-1439-25/2019 edition 2
Product features	steel toe cap
